

June 2007

Release Announcement for 3.01 of:

Mainstar[®]: VCR[™]

New Enhancements

VCR 3.01 offers several valuable enhancements and updates:

- MS/VCR renamed VCR
- New selectable feature: Fast Table Space Refresh[™] (FTR[™]) for DB2[®]
- DB2 V9 support
- New journal utility so newer releases can read journals from older releases
- DB2 Workload Manager (WLM) update support
- DFSMSdss[™] Parameter FlashCopy[®] to PPRC primary support
- Option to remove ADRDSSU keyword, CONCURRENT
- Option for VCR to wait if an ICF catalog is allocated by a non-VCR job
- Additional functionality added to DB2START command
- DB2FIX enhancements for greater flexibility
- LOGREC messages reduced
- Duplicate BCS and volume task messages for easier troubleshooting
